

Works Update

Gap Road & Horne Street intersection upgrade, Sunbury

What we're doing

We're upgrading the intersection of Gap Road and Horne Street in Sunbury, to make it safer and improve traffic flow. Works will be completed later this year.

The improvements we're making to the intersection include:

- removing the existing roundabout and installing traffic lights at the intersection
- new dedicated right-hand turning lanes from all directions
- signalised pedestrian crossings
- dedicated bike lanes
- new traffic lights synchronised with nearby level crossing

As part of this upgrade we need to relocate underground services, including phone lines and other telecommunications services, water and sewer, gas and power (including poles).

What have we completed so far?

We've been busy relocating the underground services to get the intersection ready so that we can install the new lanes and traffic lights. So far we have relocated:

- telephone lines and NBN communications services
- water services, including installation of a new water main and removal of the old water main.

What's happening now?

As service relocation works continue over the next two months we'll:

- complete NBN communications connections
- relocate power poles and overhead power lines
- remove centre islands and the roundabout
- start constructing the new pavement, drainage and signals
- commence gas service relocation works.

Relocation works involve a variety of construction techniques, with a lot happening underground and some works above ground. Our crews will need to cut into the road and excavate down to where the services are located to relocate them safely.

When to expect us

7am – 5pm, Monday to Friday

Local residents and businesses will be advised in advance if we need to extend working hours and if there are any significant changes to the program. We encourage you to sign up for our email alerts.

We may need to do overnight works that close or partially close the intersection. These works need to occur at night to minimise traffic disruption and ensure the safety of our work crews. If they're required, we'll notify you once dates are confirmed.

What to be aware of

9.30am – 3.30pm, Monday to Friday

There may be lane closures in place on weekdays outside peak hours to ensure the safety of our crew and the community, and to minimise traffic impacts.

- There may be some delays resulting from changed traffic conditions, so plan ahead and look out for signage.
- Access to homes and businesses will be available **at all times**, but if access is restricted we'll have traffic controllers on site to help maintain your access.
- There may be periods of medium-high level noise resulting from some of the digging and road-cutting works.
- Once certain services have been relocated, there may be short-term service disruptions while the new service is connected. This will be undertaken overnight where practical, to keep disruptions to a minimum. Your service provider will notify you if you are affected by this.
