#### **Site Type Rating**

- 1 isolated artefact (<5)
- 2 artefact scatter
- 3 scarred tree
- 4 earth feature / stone feature
- 5 burial

Note: Although generally the higher the site type rating the higher the scientific significance it must be stressed that these rating numbers are indicative only. To fully ascertain the scientific significance of each site further ground proofing and detailed scientific investigation would be required. Traditional cultural heritage significance of sites is not considered here (and it is likely to be high in all instances).
